

Homework 8

Julia Nelson

70 user story

2 WK sprints

15 essential users 1st

6 team members

3 month estimate 95% confident

- 1) We first need to develop/understand the needs of the project
so the 2nd step is a backlog to list the tasks to do and their story point values/complexity to order priority.
- 2) Two strategies to use would be using Story Points and Value Points to estimate priority. These along w/ methods like BFBV ~~helpful~~ and Function Points.
- 3) Tools like BFBV, and online tools like COSMIC, backlogs and other estimation ~~from~~ methods + tools can be helpful.
